ASC Management &  
Inventory Management  
Software

## About Us

To stay ahead in today's ASC market, organizations need to provide quality care through a streamlined environment. When looking to obtain efficiency and functionality, companies often face obstacles to accommodate diverse technologies, strict requirements, security concerns, and stringent business goals. These requirements usually surpass available capacity of a proper information technology infrastructure.

Mednet is a software development company backed by 18 years of experience in the Outpatient Surgical Center industry, exclusively dedicated to development, implementation, and ongoing support of a Surgical Center software - OASIS (Online Ambulatory Surgical Information Systems) and Medical Inventory Software - MIRA (Medical Inventory Reporting Application). At Mednet, we are working hard in providing our clients with the #1 Outpatient Surgical Center Software in the market.

### **Providing better Patient Care and Improving Profitability at the same time for your ASC**

Better tools in hand provides better patient care. Mednet provides the Industry's most advanced Electronic Medical Record System with a built in Form Designer helps you to customize your patient forms. In addition, a Charting Tool with Barcode Document scanning, allows you to transition from a Paper Charting system into a full EMR system at your own pace.

With the Industry's most advanced Inventory Management System, case cost management gets more accurate with Mednet including ability to add overhead costs. At the same time, Mednet helps improve your Center's revenue with built in tools such as the Virtual Aging, Follow Up Alerts, and the Smart Follow Up.

## OASIS - Online Ambulatory Surgical Information System

Mednet's OASIS offers the Industry's most detailed and all inclusive Management Software. It is one product built by one company with all the features available to everyone at no extra cost.
